

SGG DIAMANT®

Extra clear glass

Definition

SGG DIAMANT is a float glass, characterised by its low iron oxide content.

Its distinctive composition produces a higher light transmittance and a reduced green-tinge.

Range

Size: 3210 x 2250mm, 3210 x 2000mm*
(*as per availability)

Processing Possibilities

SGG DIAMANT can be :

- cut, shaped, drilled, notched and edgeworked.
- assembled into double-glazed units.
- laminated.
- toughened.
- enamelled.

- silvered.
- processed into a toughened internal all-glass door.

Applications

SGG DIAMANT is designed for applications where its unique appearance and optical qualities are of particular advantage:

- interior design and decoration.
- external cladding.
- shop windows and commercial frontages.
- bolted glass assemblies.
