

SGG SATINOVO MATE® (Higher Thickness)

Matt-finished translucent glass

NOW ALSO IN 8 & 10mm

Description

SGG SATINOVO MATE® has a distinctive, uniformly smooth and satin-like appearance. A translucent product, it admits light whilst providing obscuration and vision control.

Advantages

SGG SATINOVO MATE® is intended primarily for interior applications and offers the same benefits of flexibility of processing and installation, durability and maintenance as ordinary float glass.

- Uniform Finish
- Privacy and Light
- Reduced finger marks and stains
- Easy to process

Applications

SGG SATINOVO MATE® can be used in numerous interior design applications in both residential and commercial settings:

- Doors
- Shower screens and enclosures
- Partitions and interior screens
- Furnitures; eg cupboard doors,
- Shelves, tables etc.
- Wall cladding
- Signage
- Balustrades and guarding
- Shopfittings - displays and counter tops.

Physical properties

Acoustic and thermal performance: The same as SGG PLANILUX® clear float glass of the same thickness.

Cutting and edge working: SGG SATINOVO MATE® can be cut and edge-worked like SGG PLANILUX® clear float glass.

Processing Possibilities

SGG SATINOVO MATE® can be:

- assembled into double-glazed units
- incorporated into laminated glass and acoustic PVB laminated glass, with the treated face to the outside of the assembly.
- toughened and curved
- silvered, SGG SATINOVO-CONTRAST
- processed for fire protection.

Range

Thickness 3, 4, 5, 6mm* - **NOW ALSO IN 8 & 10mm***
Maximum size 3210 x 2250mm*

SGG SATINOVO CONTRAST®

SGG SATINOVO MATE® is also available in silvered form known as SGG SATINOVO CONTRAST®. This transforms the traditional wall cladding by giving an attractive matte metal finish to your surface. This can be processed like an ordinary silvered mirror.
