

SGG Coral Green

Description

Product application

This glass is ideal for tropical regions. It can be widely used for windows, staircase glazing, facades and balconies, amongst other applications.

Benefits

- Cuts the heat from the sun
- Keeps the interiors cool
- Reduced usage of air-conditioner
- Lower operating cost
- Protects from harmful ultraviolet rays
- Protects curtains & furnishings from fading
- Reduces the glare from the sun
- Allows optimum light transmission

Performance Table

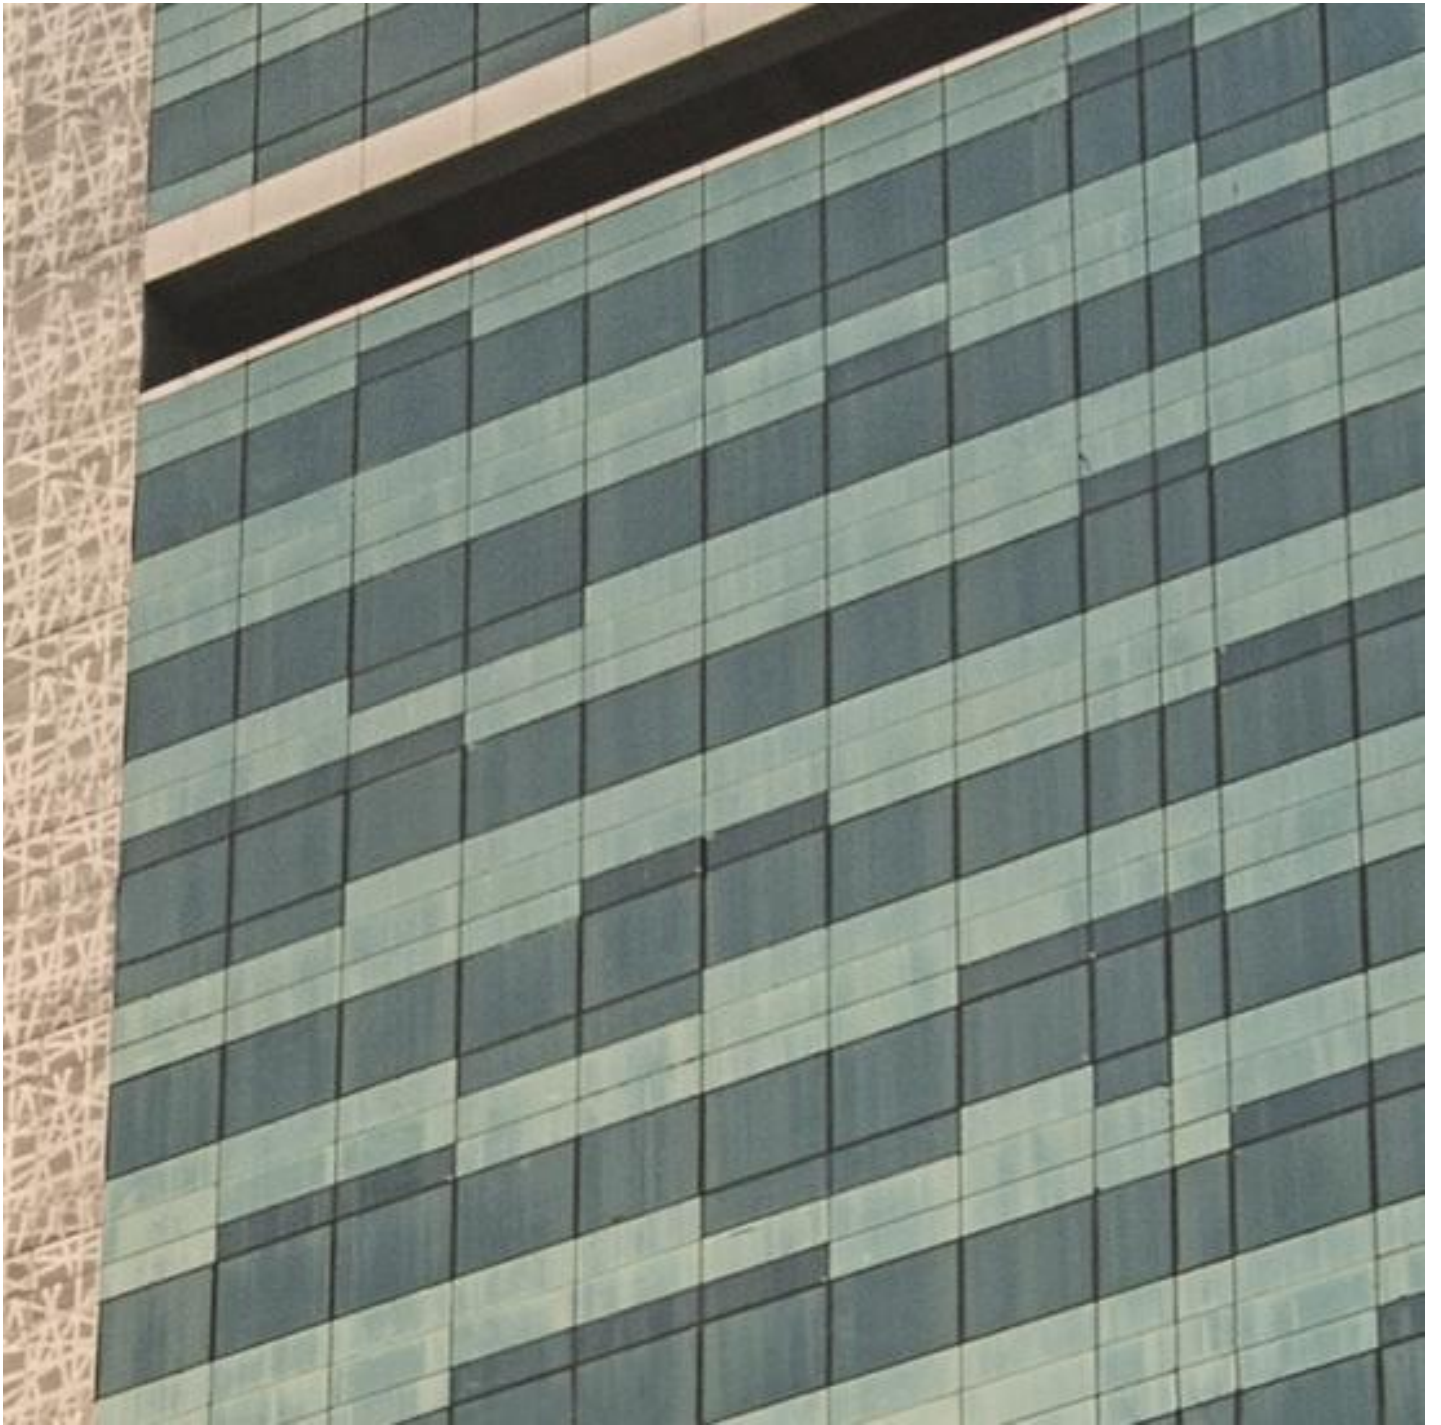

Product values given for 6mm | Luminous and Solar Characteristics are determined as per EN 410 | Thermal

transmittance is determined as per EN 673

Visual comfort	Visual comfort	Visual comfort	Thermal comfort	Thermal comfort	Thermal comfort
Visual light transmission (%)	External Reflection (%)	Internal Reflection (%)	Solar Factor (SF / SHGC)	Shading coefficient (SC)	U-value (W/m2K)
26	33	53	0.38	0.43	5.7
