

# Sage Glass

## Description

SAGEGLASS is an innovative electrochromic glass that can tint on demand allowing an unparalleled control on indoor environment and design possibilities. SAGEGLASS can respond to the exterior conditions and adjust the tint and performance to maximize comfort and energy efficiency. By extension, SAGEGLASS, through unique control systems that can manage light, glare and energy usage, eliminates the traditional sun control systems that rely on human supervision. SAGEGLASS is a fundamental shift in the way we experience buildings and a revolution in the possibilities in architectural universe.
