Hi Team,

Above are the forms for Products page. Here most of the sections are multiple addition type. Its very difficult to manage these products in excel uploads. Its better to upload products from admin login one by one.

Like products the dynamic page for content types are, Segments, Projects, Categories, Brands, Blogs, Media. If we had to keep certain pages as static like you mention for Segment page, then there will be lot of rework in second phase. So now only we are adding all these dynamic pages.

We should be able to give you admin login between 25th to 27th all at one stretch, So that you can start uploading all these pages. Adding Products, Segments, Projects, Categories, Brands, Blogs, Media.

SGG Diamant is a unique 'extra clear' High Clarity and High Definition float glass from Saint-Gobain. A result of Saint-Gobain's continuous world class research and development, SGG Diamant is significantly clearer than regular clear glass making it the world's clearest. The glass has very low iron oxide content, that gives it the extra clear properties.

Welcome to a life, now in High Definition.
